## Summary

I have progressed on the managerial path over the past 8+ years leading multi-functional teams to deliver quality products. In my spare time, I participate in hackathons to stay sharp.

## Experience

### Software Tools Program Manager at US Army

May 2017 – Present

I lead the Software Tools Program with the objective to increase team productivity and user adoption. I develop product roadmaps, outline objectives, and prioritize projects/resources using Kanban Board. I regularly work with C-Level Executives.

- Calendar Management Project that moved us from excel & personal calendars.
- Service & Incident Project helps us allocate resources and track metrics.
- SharePoint migration project focused on branding, content management, and adoption.
- Training Project helps our organization learn how to adapt our tools for their team.

### Software Development Project Manager at US Army

Mar 2015 – Apr 2017

I led a team consisting of 6 developers to implement intranet web applications. Regularly unveiled projects to Directors. Often presented to Sr. C-Level Executives.

- Implemented an app that analyzed how 8 C-Level Executives spend and forecast their time.
- Created an app to visualize personnel daily reports of 10,000 teammates for Executives.
- Deployed a Task Tracking app that manages Executive Level task management.
- Implemented a Room Scheduler Application for conference room management.
- Created a collaboration environment for working groups and planning teams.
- Automated email organization for a C-Level Execs' personal emails to SharePoint.

### Technical Project Manager

Jul 2011 - Mar 2015

Led a team of 5 supervisors to efficiently run an organization of 243 Teammates. We supported tactical teams across our organization using COTS applications.

- Project lead to onboard 115 people and \$30,000,000 of equipment.
- Executed a digital tracking management project that saved the Army \$979,000.
- Streamlined knowledge sharing for our organization that had a 35% turnover rate.
- Created the Company SOP helping us rank #1/3 after an annual training cycle.
- Ran a project to train and certify 35 teammates on 2 enterprise applications.
- Led a training program resulting in a 17% increase of our teams' physical performance.

### Hackathons

Microsoft: Created add-on to improve the organization of content using auto metadata.

Office of Hawaiian Affairs: Developed an app to increase fund allocation transparency.

Amazon: Created an educational game for Alexa that teaches geography and culture.

Microsoft: Developed a better way to increase productivity for SharePoint users.
