ANEES M. MERZI, CISSP | merzianees@gmail.com

Obsessed with making strategic-level impacts by delivering pleasant software experiences.

💼 EXPERIENCE

<u>Technical Product Manager</u> – *US Army*   July 2018 – Present

I lead 3 teams (12 teammates) that regularly create and present data visualization products to Senior Managers. All 3 products had strategic level impacts given their visibility at C-Level.

• Managed a product team to visualize opponent play calling for the ranked Football team.
• Owner for a crime map product that helps a 3-Star General make policy decisions.
• Product lead for a diversity product that drives outreach and recruiting efforts.

<u>Software Product Owner</u> – *US Army*   May 2017 – June 2018

Interfaced with 4 Project Managers to accomplish our program goals for 10,000 employees. I developed roadmaps & user stories, prioritized features, and led standup meetings.

• Streamlined the Executive Summary Reporting and Archiving for 21 organizations.
• Revamped the Travel Approval process that is used by 1,900+ teammates annually.
• Implemented a calendar product that feeds an roadmap for events in 13 different countries.
• Created a hands-on training program roadmap and vision for employee on-boarding.

<u>Software Development Project Manager</u> – *US Army*   May 2015 – April 2017

Led our team of 6 teammates to deliver user-centered products. Responsible for hiring 2 new teammates, creating budget reports, and reporting our weekly status to senior management.

• Streamlined how we forecast 12 Senior Leaders and their engagements across the world.
• Automated the daily report of 10,000 employees that fed an executive dashboard.
• Created an Executive Level task manager to effectively manage 22,000+ tasks annually.
• Centralized Conference Room Scheduling of 223 rooms making it easy to book & manage.

<u>Technical Project Manager</u> – *US Army*   Jul 2011 - Apr 2015

Led a team of 5 supervisors to efficiently run an organization of 243 Teammates.

• Project lead to onboard 115 people and $30,000,000 of equipment.
• Executed a digital tracking management project that saved the Army $979,000.
• Ran a project to train and certify 45 teammates on 2 enterprise applications.

🛠 <u>Hackathons</u>

I'd love to share some of my work for companies like Twitch, Microsoft, Amazon, and USDA.

🎓 EDUCATION

<u>Texas A&M University-CT</u> – *MS Computer Information Systems*
<u>United States Military Academy at West Point:</u> *BS Arabic with Computer Science*
